

Anderson Diagnostics & Labs Marks Their 15-Year Journey in Healthcare Excellence

Category: Business

written by News Mall | February 10, 2025

Anderson Diagnostics & Labs, a trusted name in healthcare, proudly celebrates its 15th anniversary, marking a significant milestone in its journey of delivering quality diagnostics services across Tamil Nadu. From its humble beginnings with a single laboratory, the organisation has grown to encompass seven state-of-the-art PET centres, providing cutting-edge diagnostic services to communities across the region.

This milestone underscores Anderson Diagnostics' unwavering commitment to combining advanced technology with personalised care to enhance lives and ensure better health outcomes.

Growing Roots Across Tamil Nadu

What began as a **Diagnostic Centre in Chennai** has grown into a family of several diagnostic facilities, carefully chosen to serve both city dwellers and those in smaller towns who previously had limited access to quality diagnostics. Over the years, Anderson Diagnostics & Labs has brought the much-needed medical technology to Tamil Nadu. To highlight a few, they offer an advanced PET CT scan facility in Chennai to provide affordable, state-of-the-art cancer diagnostics.

Their patients no longer need to travel far for a PET scan or wait weeks for breast cancer screening results. Experts at Anderson Diagnostics have screened more than 12,000 local women for breast and cervical cancer, catching problems early when treatment works best. Along the way, they have grown their team significantly, creating good jobs for local healthcare workers who share their passion for patient care.

“Back in 2008, we started with just a simple goal,” says Dr. Srinivasaraman G., Director of Anderson Diagnostics & Labs. “We wanted to bring world-class diagnostics to our communities. Knowing that we have impacted lives by detecting early-stage cancers and helping families make informed health decisions, we feel proud to see that vision has become a reality.”

Innovation as the Cornerstone

Anderson Diagnostics & Labs has always prioritised innovation. By integrating cutting-edge diagnostic modalities with a patient-centric approach, the organisation has introduced breakthrough technologies, including advanced cancer diagnostics, clinical genetics, neurogenetics, and infectious disease screening.

“Our focus has always been on combining technology and expertise to deliver exceptional healthcare,” added Dr. Srinivasaraman G. “We continue to invest in advanced diagnostic solutions, ensuring every patient receives precise, efficient, and reliable care.”

Commitment to Preventive Care and Community Health

Beyond diagnostics, Anderson Diagnostics & Labs takes pride in promoting preventive healthcare. Understanding the importance of early detection, Anderson Diagnostics & Labs offers a comprehensive suite of health check packages tailored to different age groups, lifestyles, and risk factors. These packages are carefully designed to identify potential health concerns before they become serious.

The organisation’s flagship preventive oncology programs have significantly contributed to early detection and better management of life-threatening conditions.

Anderson Diagnostics & Labs also actively engages with local communities to raise awareness about the importance of timely

diagnostic interventions, reinforcing its mission to foster a healthier society.

Looking ahead, Anderson Diagnostics plans to bring their blend of personal care and advanced diagnostics to more communities. They're exploring how artificial intelligence can enhance their work while keeping the human connection that has defined their service.

About Anderson Diagnostics

Established in 2008, Anderson Diagnostics & Labs is a premier diagnostic healthcare provider with a vision to revolutionise healthcare outcomes. Specialising in oncology, clinical genetics, and fetal medicine, the organisation combines state-of-the-art technology with a dedicated team of experts to deliver precision diagnostics. With seven centres across Tamil Nadu, Anderson Diagnostics serves thousands of patients annually, setting benchmarks in diagnostic excellence.
