- Agentic isAI is a no-code, autonomous AI platform that learns from behavior and automates enterprise operations without human prompts
- Business Core Solutions is a Chennai-based tech company delivering enterprise-grade automation platforms trusted by global industry leaders

The Chennai-based technology company [Business Core Solutions](#) (BCS) has launched Agentic isAI, a path-breaking, autonomous AI platform that reimagines enterprise automation. This first-

of-its-kind solution empowers businesses to proactively manage operations, reduce downtime, and automate critical workflows, all without the need for prompts, coding, or training data.

Chennai's BCS Launches Agentic isAI, a No-Code, Self-Orchestrating AI Built for Business Automation

True to its name, which is inspired by the Tamil word “**Isai**” – meaning music, Agentic isAI has the ability to bring harmony and intelligence to complex enterprise systems. Unlike traditional AI systems that require extensive training data or manual prompts, Agentic isAI operates with true autonomy – it can observe system behaviour, detect anomalies, and initiate responses without human intervention. The solution is designed as a no-code platform – it learns from real-time patterns instead of relying on pre-trained models, making it faster to deploy and easier to adapt across industries.

Built for enterprise environments, it seamlessly integrates with platforms like SAP, Azure, Salesforce, Oracle, and more. Already in production with leading global clients, it is helping reduce downtime, prevent job failures, optimise cloud usage, and automate critical business operations at scale.

BCS is a Chennai-based enterprise technology company specialising in intelligent automation platforms for global businesses. Its flagship solutions, including Symphony for process orchestration, Anugal for identity governance, and DQView for data quality management, are trusted by Fortune 100 companies and industry leaders across the US, Europe, Middle East, and Asia-Pacific. With the launch of Agentic isAI, BCS continues to push the boundaries of scalable, AI-driven enterprise automation.

In his comments, **Mr. Prakash Palani, Founder, Business Core Solutions**, said, *"We're proud and excited to launch Agentic isAI, a product that reflects years of deep enterprise insight and cutting-edge innovation. What makes Agentic isAI truly path-breaking is its ability to act autonomously, without prompts, training data, or code, and still deliver reliable, enterprise-grade automation. We believe this platform has the power to fundamentally transform how businesses operate, making them more responsive, efficient, and resilient in a fast-changing world."*

He added: *"Innovations like this are often expected to emerge from Silicon Valley or other global tech hubs. But Agentic isAI was imagined, engineered, and brought to life right here in Tamil Nadu. It proves that world-class enterprise technology can be built anywhere, as long as there is intent, talent, and vision. This launch isn't just a milestone for us. It's a moment of pride for the entire region."*

Beyond Agentic isAI, BCS offers a suite of powerful enterprise platforms designed to address core operational challenges. Symphony is an AI-powered orchestration platform that streamlines IT and business processes, enabling seamless automation across complex systems. Anugal focuses on identity and access governance, helping organizations ensure compliance, manage risk, and enforce security with precision. Meanwhile, DQView is a modern data quality platform that brings visibility, validation, and trust to enterprise data

landscapes. These solutions reflect BCS's commitment to building deeply integrated, scalable technologies that drive measurable impact for global businesses.

At the heart of BCS is a belief that technology and social responsibility can grow together. The company has consistently invested in inclusive hiring, with over half its workforce comprising individuals from underrepresented backgrounds, including first-generation graduates, rural youth, women returning to work, and persons with hearing and speech impairments. Through initiatives like the BCS Academy, which trains and places students, and HERizon, which supports women re-entering the workforce, BCS has created not just jobs, but opportunities for transformation. Its social initiatives also extend to improving public education, installing clean water systems, and nurturing local talent, making it a company where business success and human impact go hand in hand.
