The patient, a 65-year-old retired businessman, had been experiencing excruciating knee pain and limited mobility due to advanced osteoarthritis. **Dr. Rajamanya**, selected the **Evolution Medial-Pivot Knee** for the patients total knee replacement surgery, citing its exceptional clinical track record. This implants unique design offers flexion stability, anatomic motion, and a wear-limiting design.

"I have used Evolution Medial-Pivot Knee extensively in a very short time and am impressed with the overall outcome," said **Dr. Rajamanya**. *"It allows for a more natural motion of the knee, closely replicating the kinematics of a healthy knee joint. The medial-pivot design enables patients to achieve a more natural range of motion, which is essential for optimal knee function and patient satisfaction."*

Dr. Mukesh Parmar, Director and General Manager for South Asia, Microport Orthopedics, said, *"We are committed to delivering innovative solutions that improve patient outcomes. The Evolution Medial-Pivot Knee is a testament to our*

dedication to advancing orthopaedic care and providing patients with a better quality of life."

The Evolution Medial-Pivot Knee has demonstrated exceptional clinical success worldwide, with documented 98.8% survivorship at 17 years and a 95% patient satisfaction rate. With over 25 years of documented usage, MicroPort Orthopedics line of Medial-Pivot products has been utilised in over 1,000,000 cases across 70 countries worldwide.

The patient has made a successful recovery, experiencing improved mobility and reduced pain, thanks to the Evolution Medial-Pivot Knee, patient rehab and Surgical expertise. This successful outcome underscores the implants effectiveness in restoring knee function and improving patient quality of life.

The introduction of the Evolution Medial-Pivot Knee in India marks a significant milestone for MicroPort Orthopedics, further solidifying its position as a leader in orthopaedic innovation.
