

pCloud Launches 11.11 Exclusive Offer: Lifetime Storage and Encryption Plans at Record-Low Prices

Category: Business

written by News Mall | November 6, 2025

Swiss-based cloud storage provider **pCloud**, trusted by more than 22 million users worldwide, announced today the launch of its exclusive 11.11 Mega Sale for Asia. Running from November 3 to November 17, 2025, this promotion marks one of pCloud's most significant offerings yet, giving users in Asia access to its premium lifetime storage and security solutions at unprecedented prices.

This year's promotion features two standout offers – the 3-in-1 Ultimate Bundle and the 10TB Lifetime Plan – designed to meet the growing demand for privacy, efficiency, and lifetime ownership in the digital storage industry.

The 3-in-1 Ultimate Bundle – Complete Digital Protection in One Solution

The 3-in-1 Ultimate Bundle combines 5TB of Lifetime Cloud Storage, pCloud Encryption, and pCloud Pass Premium, providing an all-encompassing suite of tools for digital privacy and data management.

The bundle is now available for \$599 (originally \$1,562), giving users long-term access to premium services without any ongoing subscriptions or renewal fees.

With this package, individuals and organizations gain:

- **5TB Lifetime Cloud Storage:** Securely store, sync, and share all digital content, from personal memories to

business files, in a highly reliable Swiss cloud infrastructure.

- **pCloud Encryption:** pCloud's zero-knowledge encryption ensures that only the file owner can access private data, keeping sensitive information safe from unauthorized access.
- **pCloud Pass Premium:** An end-to-end encrypted password manager that simplifies and secures login credentials across devices.

By combining these three solutions, pCloud provides a seamless and sustainable approach to digital life management – where privacy, control, and accessibility coexist.

10TB Lifetime Plan – Record-Breaking Value for Massive Storage Needs

For the first time, pCloud introduces its **10TB Lifetime Plan** at just **\$799 (originally \$1,890)** – the lowest price in the company's history. The plan caters to professionals, photographers, families, and digital creators who require extensive and permanent storage space.

With lifetime access, customers avoid recurring subscription costs while enjoying the peace of mind that their data remains secure, backed by Swiss data protection laws and European Union privacy standards.

Strengthening pCloud's Presence in Asia

pCloud's 11.11 campaign reflects its growing commitment to the Asian market. The company has seen consistent growth in user adoption across **Hong Kong, Taiwan, Singapore, and Malaysia**, regions known for their high digital literacy and emphasis on privacy.

pCloud's offerings align with these markets' needs – providing users with **cost-effective, transparent, and secure** storage solutions without hidden fees or long-term contracts.

pCloud

Founded in Switzerland, **pCloud** is one of the world's leading cloud storage and file management platforms, offering secure, easy-to-use solutions for individuals and businesses. With features such as lifetime plans, zero-knowledge encryption, and password management, pCloud is redefining how users store, protect, and access their data.

The company operates under strict Swiss and EU data protection standards, ensuring that all stored files remain private and secure. pCloud continues to innovate in cloud technology, delivering reliable, transparent, and privacy-focused solutions to more than 22 million users globally.
