

Trackase Launches AI-Enabled GST Litigation Management Platform to Streamline Dispute Handling

Category: Business

written by News Mall | November 15, 2025

India's AI-enabled GST litigation management platform, Trackase, has launched to redefine how businesses, law firms, tax experts, and Chartered Accountants manage GST disputes while bringing automation, transparency, and speed to one of the most complex aspects of indirect taxation.

The company marks a major step forward in simplifying and digitizing GST dispute management across India's legal and tax ecosystem. Built with the vision to streamline case tracking, document management, and workflow automation, the platform empowers organizations to handle GST litigation seamlessly – minimizing manual errors, improving coordination, and saving valuable time.

As India's GST framework continues to evolve, the complexity and volume of litigation are expanding rapidly, creating an urgent need for smarter, technology-driven solutions. Trackase addresses this challenge through a single, integrated platform that automates litigation workflows, centralizes documentation, and provides real-time visibility across multiple jurisdictions and stages of the litigation process.

Commenting on the launch, **Mr Aditya Singhania, Founder and**

CEO, Trackase, said, *“The landscape of GST litigation in India is evolving rapidly, and managing it manually has become increasingly inefficient and error-prone. We built this platform to bring structure, transparency, and speed to the entire litigation management process. Our goal is to empower tax and finance professionals with the tools they need to stay compliant and make informed decisions.”*

Through intelligent automation and analytics, Trackase serves as a strategic enabler for CFOs, tax heads, compliance officers, and Chartered Accountants, helping them not only manage disputes efficiently but also extract valuable insights from their litigation data to improve strategic decision-making.

The platform is equipped with a suite of powerful features. Its smart case tracking module allows real-time monitoring of GST litigation cases across jurisdictions and authorities. The centralized document management system ensures secure, cloud-based access to all filings and case-related records. A robust workflow automation engine delivers timely alerts, task assignments, and escalation reminders to reduce manual effort. Additionally, data-driven dashboards and analytics help users visualize dispute trends, monitor performance, and make evidence-based decisions.

By combining automation, analytics, and ease of use, Trackase positions itself as a category creator and innovation leader in India’s GST technology space – setting new benchmarks for compliance efficiency and transparency.
